

**Oriented:**

- For bending of tubes, profiles and solid bars by winding method then repetition work and also then mobile works at building sites

Tooling

Consists of 3 parts:

- Bending former
- Pinch roller
- Eccentric clamp

Technical data

Maximal sectional area of bent profile	2250 (Strip 150x15 mm, steel)
Power/frequency/voltage	380 V, 2.2 kWt, 50 Hz
LxHxB, mm	1700x1200x1400
Weight, kg	1600

Base complete set

- Bending machine
- Operating manual
- Training to Customer's personnel
